This benchmark report for Essex Partnership University NHS Foundation Trust contains results for themes and questions from the 2020 NHS Staff Survey, and historical results back to 2016 where possible. These results are presented in the context of the best, average and worst results for similar organisations where appropriate. Data in this report are weighted to allow for fair comparisons between organisations.

Please note: q1, q10a, q19d, q20a-d, q22-q26a, and q27a-q28 are not weighted or benchmarked because these questions ask for demographic or factual information.

Full details of how the data are calculated and weighted are included in the Technical Document, available to download from our [results website](#).

The structure of this report

Key features

Question number and text
(or the theme) specified
at the top of each slide

Question-level results are always
reported as percentages; the **meaning
of the value** is outlined along the axis.
Themes are always on a 0-10pt scale
where 10 is the best score attainable

Colour coding highlights best / worst
results, making it easy to spot questions
where a lower percentage is better – in such
instances 'Best' is the bottom line in the table

 **Keep an eye out!**

Number of responses
for the organisation
for the given question

Slide headers are **hyperlinked** throughout the document. '2020
NHS Staff Survey Results' takes you back to the contents page
(which is also hyperlinked to each section), while the rest of the text
highlighted in bold can be used to navigate to sections and sub-sections

Tips on how to read, interpret and use
the data are included in the [Appendices](#)

'Best', 'Average', and 'Worst' refer to the
benchmarking group's best, average and worst **results**

Median response rate: **49%**

No. of completed questionnaires:
109,280

Theme results

The calculation for the immediate managers theme has changed this year due to the omission of one of the questions which previously contributed to the theme. This change has been applied retrospectively so data for 2016-2020 shown in the charts are comparable for this theme, however these figures are not directly comparable to the results reported in previous years. For more details please see the [technical document](#).

Theme results – Covid-19 classification breakdowns

Essex Partnership University NHS Foundation Trust
2020 NHS Staff Survey Results

Covid-19 questions

Staff were asked four classification questions relating to their experience during the Covid-19 pandemic:

- | | | |
|--|--|--|
| a. Have you worked on a Covid-19 specific ward or area at any time? | ☐ Yes | ☐ No |
| b. Have you been redeployed due to the Covid-19 pandemic at any time? | ☐ Yes | ☐ No |
| c. Have you been required to work remotely/from home due to the Covid-19 pandemic? | ☐ Yes | ☐ No |
| d. Have you been shielding? | ☐ Yes, for myself | ☐ Yes, for a member of my household |
| | | ☐ No |

The charts on the following pages show the breakdown of theme scores for staff answering 'yes' to each of these questions, compared with the results for all staff at your organisation. Results are presented in the context of the highest, average and lowest scores for similar organisations.

Comparing your data

To improve overall comparability, the data have been weighted to match the occupation group profile of staff at your organisation to that of the benchmarking group, as in previous charts. However, there may be differences in the occupation group profiles of the individual COVID-19 subgroups. For example, the mix of occupational groups across redeployed staff at your organisation may differ from similar organisations. This difference would not be accounted for by the weighting and therefore may affect the comparability of results. As such, a degree of caution is advised when interpreting your results.

Further information

Results for these groups of staff, including data for individual questions, are also available via the [online dashboards](#). Please note that results presented in these dashboards have not been weighted where no benchmarking takes place and so may vary slightly from those shown in this report.

Question results – Your health, well-being and safety at work

The way in which the data for Q12d and Q13d are reported has changed this year. This change has been applied retrospectively so the data for 2016-2020 shown in the charts for these questions are comparable. However, these figures are not directly comparable to the results reported in previous years.

For more details please see the [technical document](#).

Question results – The Covid-19 pandemic

Essex Partnership University NHS Foundation Trust
2020 NHS Staff Survey Results

Question results – Background details

Essex Partnership University NHS Foundation Trust
2020 NHS Staff Survey Results

Do you have any physical or mental health conditions or illnesses lasting or expected to last for 12 months or more?

Has your employer made adequate adjustment(s) to enable you to carry out your work?

Your org	23.7%	77.5%
Average	24.5%	81.2%
Responses	2,288	338

Do you have any children aged from 0 to 17 living at home with you, or who you have regular caring responsibility for?

Do you look after, or give any help or support to family members, friends, neighbours or others because of either: long term physical or mental ill health / disability, or problems related to old age?

Workforce Equality Standards

Essex Partnership University NHS Foundation Trust
2020 NHS Staff Survey Results

This section contains data required for the NHS Staff Survey indicators used in the Workforce Race Equality Standard (WRES) and Workforce Disability Equality Standard (WDES). Data presented in this section are unweighted.

Full details of how the data are calculated are included in the Technical Document, available to download from our [results website](#).

Workforce Race Equality Standard (WRES)

- This contains data for each organisation required for the NHS Staff Survey indicators used in the Workforce Race Equality Standard (WRES). It includes the 2017, 2018, 2019 and 2020 trust/CCG and benchmarking group median results for q13a, q13b&c combined, q14, and q15b split by ethnicity (by white / BME staff).

Workforce Disability Equality Standard (WDES)

- This contains data for each organisation required for the NHS Staff Survey indicators used in the Workforce Disability Equality Standard (WDES). It includes the 2018 and 2019 trust/CCG and benchmarking group median results for q5f, q11e, q13a-d, and q14 split by staff with a long lasting health condition or illness compared to staff without a long lasting health condition or illness. It also shows results for q26b (for staff with a long lasting health condition or illness only), and the staff engagement score for staff with a long lasting health condition or illness, compared to staff without a long lasting health condition or illness and the overall engagement score for the organisation.
- The WDES breakdowns are based on the responses to q26a ***Do you have any physical or mental health conditions or illnesses lasting or expected to last for 12 months or more?*** In 2020, the question text was shortened and the word 'disabilities' was removed but the question and WDES results still remain historically comparable.

Workforce Disability Equality Standard (WDES)

The approach to calculating the benchmark median scores and the way in which the data for Q13d are reported has changed this year. These changes have been applied retrospectively so historical data shown in the average calculations and all figures for Q13d are comparable. However, these figures are not directly comparable to the results reported in previous years. For more details please see the [technical document](#).

Appendices

Essex Partnership University NHS Foundation Trust
2020 NHS Staff Survey Results

Appendix A: Response rate

Best	67.5%	66.5%	65.7%	66.0%
Your org	41.8%	43.0%	48.3%	46.7%
Median	48.4%	48.6%	51.8%	49.3%
Worst	31.7%	30.5%	31.6%	35.6%

Appendix B: Significance testing - 2019 v 2020 theme results

The table below presents the results of significance testing conducted on this year's theme scores and those from last year*. It details the organisation's theme scores for both years and the number of responses each of these are based on.

The final column contains the outcome of the significance testing: **↑** indicates that the 2020 score is significantly higher than last year's, whereas **↓** indicates that the 2020 score is significantly lower. If there is no statistically significant difference, you will see 'Not significant'. When there is no comparable data from the past survey year, you will see 'N/A'.

Theme	2019 score	2019 respondents	2020 score	2020 respondents	Statistically significant change?
Equality, diversity & inclusion	8.9	2242	9.0	2293	Not significant
Health & wellbeing	6.1	2250	6.4	2297	↑
Immediate managers †	7.2	2248	7.3	2297	Not significant
Morale	6.2	2237	6.4	2295	↑
Quality of care	7.5	1891	7.6	1906	↑
Safe environment - Bullying & harassment	7.9	2241	8.0	2281	Not significant
Safe environment - Violence	9.4	2241	9.5	2288	↑
Safety culture	6.7	2252	6.9	2296	↑
Staff engagement	7.0	2273	7.2	2303	↑
Team working	6.9	2234	6.9	2267	Not significant

* Statistical significance is tested using a two-tailed t-test with a 95% level of confidence.

† The calculation for the immediate managers theme has changed this year due to the omission of one of the questions which previously contributed to the theme. This change has been applied retrospectively so data for 2016-2020 shown in this table are comparable. However, these figures are not directly comparable to the results reported in previous years. For more details please see the [technical document](#).

Appendix C: Tips on using your benchmark report

The following pages include tips on how to read, interpret and use the data in this report. The **suggestions are aimed at users who would like some guidance on how to understand the data** in this report. These suggestions are by no means the only way to analyse or use the data, but have been included to aid users transitioning from the previous version of the benchmark report and those who are new to the Staff Survey.

Key points to note

- The themes cover ten areas of staff experience and present results in these areas in a clear and consistent way. All of the ten themes are scored on a 0-10 scale, where a higher score is more positive than a lower score. These theme scores are created by scoring question results and grouping these results together.

- A key feature of the reports is that they **provide organisations with up to 5 years of trend data** across theme **and** question results. Trend data provides a much **more reliable indication of whether the most recent results represent a change from the norm** for an organisation than comparing the most recent results to those from the previous year. Taking a longer term view will help organisations to identify trends over several years that may have been missed when comparisons were drawn solely between the current and previous year.

- **Question results are benchmarked** so that organisations can make comparisons to their peers on specific areas of staff experience. Question results provide organisations with more granular data that will help them to identify particular areas of concern. The trend data are benchmarked so that organisations can identify how results on each question have changed for themselves and their peers over time by looking at a single graph.

When analysing theme results, it is easiest to start with the **theme overview** page to quickly identify areas which are doing better or worse in comparison to other organisations in the given benchmarking group.

It is important to **consider each theme result within the range of its benchmarking group 'Best' and 'Worst' scores**, rather than comparing theme scores to one another. Comparing organisation scores to the benchmarking group average is another important point of reference.

Areas to improve

- By checking where the 'Your org' column/value is lower than the benchmarking group 'Average' you can quickly identify areas for improvement.
- It is worth looking at the difference between the 'Your org' result and the benchmarking group 'Worst' score. The closer your organisation's result is to the worst score, the more concerning the result.
- Results where your organisation's score is only marginally better than the 'Average', but still lags behind the best result by a notable margin, could also be considered as areas for further improvement.

Positive outcomes

- Similarly, using the overview page it is easy to identify themes which show a positive outcome for your organisation, where 'Your org' scores are distinctly higher than the benchmarking group 'Average' score.

Only one example is highlighted for each point

- Positive stories to report could be ones where your organisation approaches or matches the benchmarking group's 'Best' score.

Review trend data

Trend data can be used to identify measures which have been consistently improving for your organisation (i.e. showing an upward trend) over the past years and ones which have been declining over time. These charts can **help establish if there is genuine change in the results** (if the results are consistently improving or declining over time), or whether a change between years is just a minor **year-on-year** fluctuation.

Benchmarked trend data also allows you to review local changes and benchmark comparisons at the same time, allowing for various types of questions to be considered: e.g. how have the results for my organisation changed over time? Is my organisation improving faster than our peers?

Review questions feeding into the themes

In order to understand exactly which factors are driving your organisation's theme score, you should review the questions feeding into the theme. The **'Detailed information'** section contains the questions contributing to each theme, grouped together, thus they can be reviewed easily without the need to search through the 'Question results' section. By comparing 'Your org' scores to the benchmarking group 'Average', 'Best' and 'Worst' scores for each question, the **questions which are driving your organisation's theme results can be identified**.

For themes where results need improvement, action plans can be formulated to **focus on the areas where the organisation's results fall between the benchmarking group average and worst results**. Remember to keep an eye out for questions where a lower percentage is a better outcome – such as questions on violence or harassment, bullying and abuse.

✗ = Negative driver, org result falls between average & worst benchmarking group result for question

This benchmark report displays results for all questions in the questionnaire, including benchmarked trend data wherever available. While this a key feature of the report, at first glance the amount of information contained on more than 180 pages might appear daunting. The below suggestions aim to provide some guidance on how to get started with navigating through this set of data. It is worth noting that a PDF summary report is also available. This presents the same data as this main benchmark report, but does not include the detailed question level reporting.

Identifying questions of interest

➤ Pre-defined questions of interest – key questions for your organisation

- Most organisations will have questions which have traditionally been a focus for them. Questions which have been targeted with internal policies or programmes, or whose results are of heightened importance due to organisation values or because they are considered a proxy for key issues. Outcomes for these questions can now be assessed on the backdrop of benchmark and historical trend data.
- **Note:** The bookmarks bar allows for easy navigation through the report, allowing subsections of the report to be folded, for quick access to questions through hyperlinks.

Use the bookmarks bar to navigate directly to questions of interest

➤ Identifying questions of interest based on the results in this report

The methods recommended to review your theme results can also be applied to pick out question level results of interest. However, **unlike themes where a higher score always indicates a better result, it is important to keep an eye out for questions where a lower percentage relates to a better outcome** (see details on the 'Using the report' page in the 'Introduction' section).

- **To identify areas of concern:** look for questions where the organisation value falls between the benchmarking group average and the worst score, particularly questions where your organisation result is very close to the worst score. Review changes in the trend data to establish if there has been a decline or stagnation in results across multiple years, but consider the context of how the trust has performed in comparison to its benchmarking group over this period. A positive trend for a question that is still below the average result can be seen as good progress to build on further in the future.
- **When looking for positive outcomes:** search for results where your organisation is closest to the benchmarking group best result (but remember to consider results for previous years), or ones where there is a clear trend of continued improvement over multiple years.

Appendix D: Additional reporting outputs

Below are links to other key reporting outputs which complement this report. A full list and more detailed explanation of the reporting outputs is included in the Technical Document.

Supporting documents

-  **[Basic Guide](#)**: Provides a brief overview of the NHS Staff Survey data and details on what is contained in each of the reporting outputs.
-  **[Technical Document](#)**: Contains technical details about the NHS Staff Survey data, including: data cleaning, weighting, benchmarking, theme, historical comparability of organisations and questions in the survey.

Other local results

-  **[Benchmark summary reports](#)**: A PDF summary version of this benchmark report, that produces the same data, but does not include the detailed question level reporting.
-  **[Local Breakdowns](#)**: Dashboards containing results for each organisation broken down by demographic characteristics. Data is available for up to five years where possible.
-  **[Directorate Reports](#)**: Reports containing theme results split by directorate (locality) for Essex Partnership University NHS Foundation Trust.

National results

-  **[National Trend Data](#)** and **[National Breakdowns](#)**: Dashboards containing national results – data available for five years where possible.
-  **[National Free Text report](#)**: A PDF report will be available from April 2021 that highlights the themes, subthemes and sentiment scores of the free text comments from questions 21a and 21b.
